

At WB Projects we seek excellence in every aspect of our business. We are committed to minimising the environmental impacts of our operations and working towards a sustainable business. Our Environmental Management System (EMS) supports this policy and gives us a clear and rigorous structure for achieving our goals:

Our key goals are:

- To achieve a recycling rate of over 75% by minimising and controlling waste, segregating for reuse wherever practicable and developing a waste management plan for all our significant projects.
- To procure materials responsibly targeting a minimum of 75% FSC certified timber to be used on all our projects.
- Researching ways to manage and reduce our carbon footprint

We will encourage more sustainable fitout practices by training our staff and promoting environmental best practice to our clients. We aim to develop and apply industry best practice and are committed to complying with all relevant legislation, and regulations. This will assist us in our quest for continual, sustainable improvement in our overall environmental performance
